INCIDENT MANAGEMENT SITUATION REPORT TUESDAY, JULY 3, 2001 - 0530 MDT NATIONAL PREPAREDNESS LEVEL 2

#### CURRENT SITUATION:

Three new large fires were reported, one in Colorado and two in southern California. Five large fires were contained, four in Southern Area and one in Colorado. Initial attack activity was moderate in California, Eastern Great Basin, Southwest, Eastern and Southern Areas; and was light elsewhere. Very high to extreme indices were reported in Alaska, Arizona, California, Colorado, Idaho, Kansas, Montana, Nevada, New Mexico, Oregon, Utah, Washington and Wyoming.

#### ALASKA AREA LARGE FIRES:

NORTH SHORE KENAI LAKE, Chugach National Forest. A Type 1 Incident Management Team (Hefner) is assigned. This fire is 12 miles north by northwest of Seward, AK. Moderation of burning conditions allowed for a direct attack strategy to continue in fire suppression actions. The fireline is holding on the north and east perimeters.

MYSTERY HILLS, Kenai National Wildlife Refuge. A Type 2 Incident Management Team (McElwain) is assigned. This fire is 2 miles north of the Sterling Highway, 45 miles northeast of Soldotna, AK. Crews have begun direct suppression activities. Downward acreage adjustment due to IR flight mapping.

FISH CREEK, Fairbanks Area, Alaska Division of Forestry. The Type 2 Incident Management Team (Jandt) has transitioned this fire back to the local unit. This fire is 12 miles southeast of Nenana, AK.

RED FOX, Tok Area, Alaska Division of Forestry. A Type 2 Incident Management Team (Kechter) is assigned. This fire is burning in mixed hardwoods and black spruce one-and-a-half miles northeast of Tok, AK. Recent cooler weather has assisted crews in containment efforts. A rehabilitation plan is being prepared.

SURVEY LINE, Fort Wainwright, Department of Defense. This fire is approximately 12 miles southwest of Fairbanks, AK. The fire is in a military limited protection area and continues to burn out interior pockets of black spruce. This will be the last report unless significant activity occurs.

### SOUTHERN CALIFORNIA AREA LARGE FIRES:

MCLAUGHLIN, Inyo National Forest. This fire is six miles northeast of Mammoth Lakes, CA. Thunderstorms and associated wind shifts have hampered suppression efforts. Current threats include structures, watershed and threatened and endangered species habitat.

CROOKED, Bakersfield District, BLM. The fire is 16 miles north by northeast of Mammoth Lakes, CA. No other information was received.

#### SOUTHWEST AREA LARGE FIRES:

ROUGH CREEK, Socorro District, New Mexico State Forestry Office. This fire is 30 miles southwest of Lordsburg, NM. No new information was received. This will be the last report unless new information is received.

WHITETAIL, Gila National Forest. A Fire Use Management Team (Cook) is assigned. This lightning caused Wildland Fire Use fire is 60 miles northwest of Truth of Consequences, NM. This will be the last report unless significant activity occurs.

BLACK, Gila National Forest. A Fire Use Management Team (Cook) is assigned. This lightning caused Wildland Fire Use fire is 35 miles north of Silver City, NM. This will be the last report unless significant activity occurs.

### ROCKY MOUNTAIN AREA LARGE FIRES:

THREE SPRINGS, Little Snake Field Office. This fire is 18 miles west of Dinosaur, CO. Containment efforts are being hampered by heavy fuel loading, poor access and shifting winds. Air tankers are assisting in containment efforts. Some structures are threatened.

BEAR SPRINGS, Pinon Canyon Maneuver Site, Department of Defense. This fire is 50 miles southeast of La Junta, CO. Gusty winds are hampering containment. Current threats are to perimeter roads.

## EASTERN GREAT BASIN AREA LARGE FIRES:

BUTTE ROAD, Lower Snake River District, BLM. This fire is ten miles northeast of Emmett, ID. No new information was received.

INCIDENT NAME	ST UNIT  									
BUTTE ROAD	ID  BOD	300	75	UNK	75 	0	7 	2	0	NR

# OUTLOOK:

High pressure over Kodiak Island will be pushed eastward by a low in the Bering Sea bringing partly cloudy skies with warmer and drier conditions to the interior. High temperatures will be in the 60's and 70's, with minimum relative humidity ranging from 35 to 50 percent. Winds will be south to southwest at 5 mph.

High pressure centered over Utah and monsoonal moisture in place over most

of Arizona and New Mexico will bring partly cloudy skies with scattered showers and thundershowers, mainly over the mountains. High temperatures will be in the 80's in the mountains, and 100 to 110 in the deserts. Minimum relative humidity will range from 15 to 30 percent. Winds will be variable at 5 to 15 mph.

An upper level disturbance will bring abundant moisture to southern Texas, while a much drier airmass will cover the rest of the state. This will bring scattered showers and thundershowers to south Texas, isolated thunderstorms to the west and central portions, and mostly sunny to the north. High temperatures will be 85 to 95, except near 105 along the Rio Grande. Minimum relative humidity will range from 20 to 40 percent, and winds will be southeast to southwest at 5 to 15 mph.

High pressure centered over Utah and a southerly flow gradually increasing from the south will bring partly cloudy skies with scattered thunderstorms over the mountains becoming isolated over the valleys. Most of the storms will have little or no precipitation, except for wet thundershowers over southern Colorado and southern Utah. High temperatures will be in the 80's in the mountains, 90 to 105 in the valleys and 110 to 115 in southern Nevada. Minimum relative humidity will range from 5 to 15 percent. Winds will be variable at 5 to 15 mph, except for portions of Nevada which will be southwest at 10 to 20 mph.
